SKILLS

- **Languages:** Java, Python, C, C++, React Native (Expo)
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Flask
- **Tools/Platforms:** MySQL, MongoDB, Android Studio, Firebase, Git, GitHub
- **Soft Skills:** Problem-Solving, Team Player, Strong Learning Agility, Adaptability

INTERNSHIP

- **InfoTech Clinic | [Certificate](#)** June 2025 - August 2025
Android App Development Intern
 - Engineered a secure Java-based Android application supporting offline CRUD for 500+ medical records, multi-profile management, and QR-based secure data transfer.
 - Optimized data access workflows, reducing report retrieval latency by ~60% and improving reliability across 100+ user sessions.**Tech:** Java, Android Studio, Firebase, SQLite, QR Code API.

PROJECTS

- **Luna - Period Tracker | [GitHub](#)** August 2025 - September 2025
 - Architected a full-stack healthcare platform featuring intelligent cycle tracking, secure real-time chatrooms, and an interactive article hub.
 - Designed an adaptive period-prediction algorithm trained on historical cycle data (6-12 months) to deliver personalized health insights.
 - Delivered a responsive cross-platform interface with real-time data sync under 1s latency.**Tech:** React Native (Expo), Node.js, Express, Socket.io, MongoDB, Firebase.
- **Care Bridge Plus - Medication Tracking & Care Assistant | [GitHub](#)** June 2025 – August 2025
 - Co-created a healthcare application featuring smart medication reminders, UID-based patient-caregiver linking, AI chat, appointment scheduling, and real-time SOS alerts.
 - Implemented low-latency data synchronization achieving sub-second message delivery across multiple user roles.
 - Enhanced performance and usability across 5+ core modules, ensuring stable real-time operations.**Tech:** Java, Android Studio, Firebase, Cloud Messaging, AI API Integration.
- **Graphical Simulator for Resource Allocation Graph | [GitHub](#)** January 2025 – March 2025
 - Constructed an interactive RAG simulator supporting dynamic creation of 10+ processes for deadlock detection.
 - Visualized OS synchronization and system state transitions using real-time graphical rendering.
 - Enabled state export and reload using the Blob API, reducing manual reconfiguration time by ~40%.**Tech:** HTML, CSS, JavaScript, Blob API.

TRAINING

- **Android App Development using Java | [W3 Grads](#)** July 2025 - August 2025
 - Completed an industry-oriented full-stack project implementing end-to-end features using modern development practices.
 - Applied best practices including responsive UI design, API error handling, environment variable management, and secure data flow.

CERTIFICATES

- Privacy and Security in Online Social Media | [NPTEL](#) October 2025
- Python (Basic) | [HackerRank](#) April 2025
- Python and Flask Framework | [Udemy](#) January 2024

ACHIEVEMENTS

- **Solved 200+ Algorithmic Problems on LeetCode(Java):**
Built strong proficiency in data structures, algorithms, and analytical problem-solving.
- **Earned Silver 3-Star Programming Badges in Java and Python on HackerRank:**
Validated core programming knowledge and consistent problem-solving performance through skill assessments.

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.15** August 2023 - July2027(Expected)
- **Floradale Public School** Sri Ganganagar, Rajasthan
Intermediate; **Percentage: 80.6** April 2022 - March 2023
- **Nosegay Public School** Sri Ganganagar, Rajasthan
Matriculation; **Percentage: 91** April 2020 - March 2021
